The new AR-6023DV is a fast A3 black & white MFP with a flexible design. This machine brings advanced functionality, impressive quality and a whole host of productivity features within reach of every small workgroup. It is ideal for all your daily black & white printing, colour scanning and copying needs.

You can print at speeds of 23 pages per minute which is more than enough to support the needs of a busy small office and fast enough for sharing on a small network if you decide to upgrade it later on. Moreover, Sharp Printer Language with Compression (SPLC) comes as standard which means faster data transfer and enhanced throughput too. As well as optimised performance, the AR-6023DV offers an expandable paper supply with the option to increase the capacity up to 1,850 sheets.

Copying is just as quick and easy as printing. A first copy out time of 6.4 seconds eliminates unnecessary delays from multiple short run jobs and the optimised Scan Once/Print Many technology simplifies longer runs. The built in A3 scanner allows documents to be colour scanned directly to your PC or other device. Scanned files can also be stored on a file server for easy access from any PC on the network, and they can also be sent as an attachment to any e-mail address. A USB memory stick port for walk-up scanning is also included

Other useful copying functions include ID Card Copy and Rotation Sort, as well as electronic collation and sorting. You can also add a document feeder for scanning documents in large batches. Duplex printing and copying is a standard feature of the AR-6023DV.

In addition, if you add Sharpdesk Mobile you'll be able to make your MFP accessible to tablets and mobile phones of your visitors and employees - they will be able to print from - or scan to - their mobile devices without a cable connection.

In summary, the energy efficient AR-6023DV offers all the essential features you need and is perfect for the small workgroup.
