SMART CHOICES FOR DIGITAL SIGNAGE SOLUTIONS

Sharp Digital Signage Software (SDSS) is a highly versatile, yet easy-to-use, management software solution that provides total support for creating, scheduling, distributing, displaying and monitoring all types of digital signage deployments. Whether you're deploying just a single display or a network of one thousand displays, Sharp offers a version of SDSS that's right for you.

Audiences move on, messages change /This is Why we've made it easy to add, change and control content.

1. ADD AND ARRANGE CONTENT

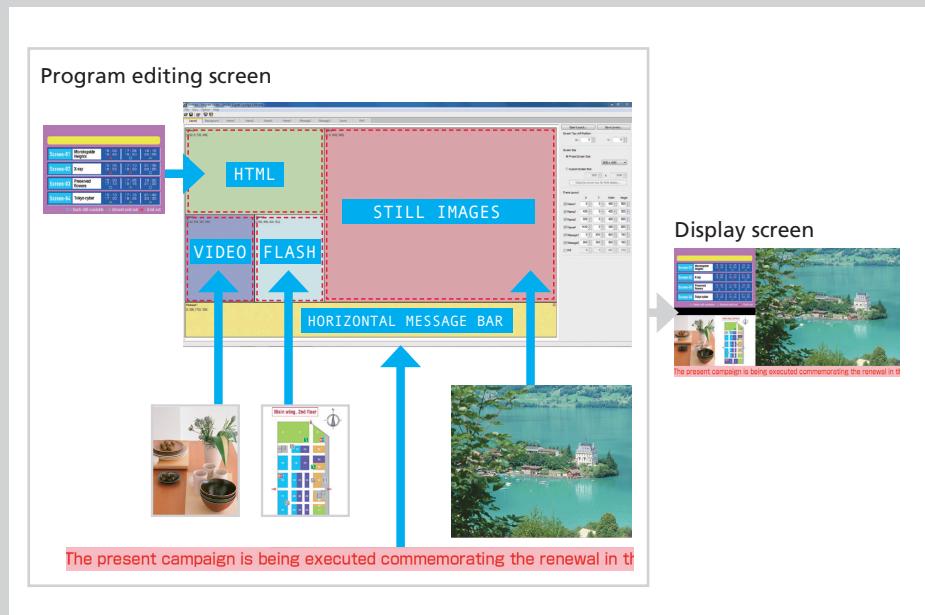

Quickly create all kinds of digital signage with customisable layouts and the ability to use the most popular types of content in order to meet virtually any design requirement.

Screen Layout

Screen layouts can accommodate both horizontal and vertical screen orientation, include up to 4 adjustable size and position frames, and offer up to 2 scrollable message bars. Easily add still images, full-motion video, HTML, Adobe® Flash® files and even Microsoft® PowerPoint® presentations with simple drag and drop.

Special Effects

Make your images come to life using a wide array of special effects - such as wiping, blow-up, slide-in, slide-out, rotary wiping, and much more.

2. CREATE AND EDIT SCHEDULES

Through drag-and-drop operation, you can easily specify the time and date at which programs are to be displayed.

Editing the Timetable

Specify the time of day at which each program is to be displayed.

Editing the Schedule

Specify the dates on which a timetable will be applied. Schedules can be easily created and managed on a monthly calendar-like table.

Advanced Functionality on Pro (PN-SS05) and Pro Web (PN-SW05)

Multiple programs, timetables, and schedules can be managed through a user-friendly interface. The best choice for large-scale signage systems.

3. DELIVER TIMETABLES TO SCREENS

The scheduled program can be sent to the target PC (where Viewer PN-SV01 is installed) for display.

Advanced Functionality on Pro (PN-SS05) and Pro Web (PN-SW05)

In the event of an emergency, it is possible to distribute and display emergency news flashes and scrolling messages.

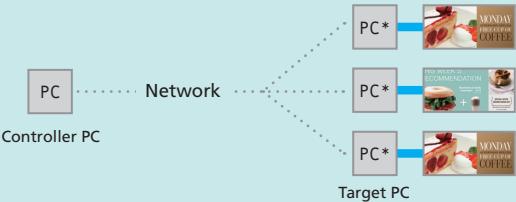

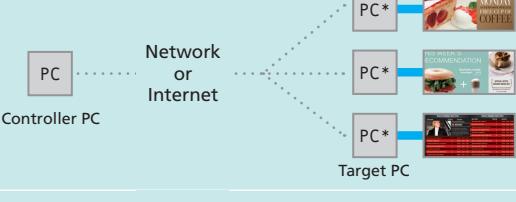

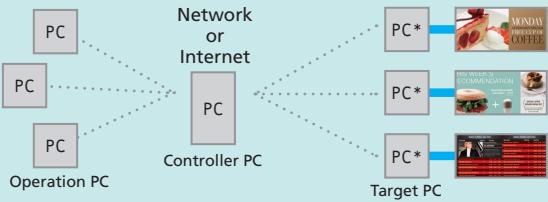

Remote Management

The operational status and the programs being displayed can be remotely monitored, so that any problems can be resolved quickly.

Advanced Functionality on Pro (PN-SS05) and Pro Web (PN-SW05)

Instant input selection and LCD monitor(s) power on/off are selectable from a controller PC. Retrieval of finished schedules is also available.

SEVERAL SDSS VERSIONS ARE AVAILABLE TO MATCH DIFFERENT DIGITAL SIGNAGE NEEDS.

	Product Name	Features	System Configuration (Examples)
Standalone Systems	Standalone PN-SS01	Scheduled programs can be delivered and displayed at a designated time on a single LCD monitor or to multiple screens via USB .	<ul style="list-style-type: none"> • Standalone operation 
Network Systems	Network PN-SS02	Enables programs to be distributed via the network or USB to one or multiple PCs for display on up to 100 LCD monitors according to a set schedule.	
	Pro PN-SS05	<p>Same functions as PN-SS02, plus support for larger and more complex systems. Can distribute scheduled programs to up to 1,000 LCD monitors.</p> <p>Supports "Pull" distribution which enables viewers to reside on Internet and dynamic viewer IP addressing.</p>	
	Pro Web Server PN-SW05	<p>Same functions as PN-SS05 and operable via a web browser. Programs, schedules, and other items can be centrally stored and managed on a web server database (i.e., a controller PC), accessible by up to 50 remote PCs.</p> <p>Hosted on your network.</p>	

	Product Name	No. of Operation PCs	No. of Target PCs	Operation Screen

NOTES

*1 An RS-232C port or LAN port is required for controlling the LCD monitor from a viewer PC. *2 Some video files may require commercially available codec. *3 Certain effects that place a load on the CPU - such as transparent message bars or fade-ins - may not display properly with lower processor.

Design and specifications are subject to change without prior notice. All information was correct at time of print.
